INFERENCE

Statement 1 :

Although it is agreed that China is rapidly modernizing its army, there is some doubt surrounding the exact amount it is spending. The research institute 'PIPPi', submits that the annual Chinese defense spending has risen from almost \$31 billion in 2000 to over \$120 billion in 2010. This figure is almost double the official figure published by the Chinese government, who fail to include other areas such as research and development in the official figure each year. In 2010, the United States government spent around \$400 billion on military defense. Based on the current level of military growth, statistics suggest that China's defense spending could overtake America's by 2030. In addition to military spending, China's army continues to enjoy the largest number of people within the ranks of its army than any other country.

1. Inference 1: The official figures published by the Chinese government in relation to their military spending are thought to be misleading.

2. Inference 2: It is known that the Chinese government leaves areas such as 'research' and 'development' from their official figures, however, this would also suggest that other areas of spending are also omitted from the official figure.

Statement 2 :

Turkey is a surprising addition to the list of rapidly developing economies; with a GDP increase of 8.5% in the year 2011 alone. However, such rapid growth leaves worries regarding possible side-effects. For instance, in 2011 Turkey's rate of inflation was well above that of its peers. Secondly, there is increasing concern regarding Turkey's growing dependency on foreign capital. A large portion of the Turkish banking system is part-owned by banks within the Eurozone. As the single currency falters, such a dependency raises questions about the stability of Turkish growth.

5. Inference 1: There are concerns that Turkey's development is at risk of faltering in the years after 2011.
- True
 - Probably True

6. Inference 2: As Turkish banks are part-owned by those in the Eurozone, they may suffer if the European banks face financial difficulty.

ARGUMENTS

Statement 1 :

Should university-level education be free to all students?

33. Argument One: No. Too much education can lead to over-qualification, and therefore unemployment.

- Strong Argument
- Weak Argument

34. Argument Two: Yes, having a highly qualified workforce ensures high levels of employee productivity in organisations.

- Strong Argument
- Weak Argument

35. Argument Three: No, research has shown that students that are not required to pay tuition fees; tend to slack off more and learn less during their degree.

- Strong Argument
- Weak Argument

Statement 2 :

Should employers allow all staff the option of flexi-time working hours?

36. Argument One: Yes, giving staff greater flexibility will improve their work-life balance, and therefore their productivity.

- Strong Argument
- Weak Argument

37. Argument Two: Yes, organisations that value their staff are on average more productive and show lower staff turnover.

- Strong Argument
- Weak Argument

38. Argument Three: No, flexi time leads to employees working fewer hours. Working fewer hours will decrease an employee's exposure to the

workplace, making career progression harder and leading to a less experienced workforce.

- Strong Argument
- Weak Argument

Statement 3 :

Should governments implement a minimum wage, outlining a minimum amount an employee is to be paid per hour?

39. Argument One: Yes, the existence of minimum wages is a key part of a civilised society.

- Strong Argument
- Weak Argument

40. Argument Two: Yes, countries that do not have a minimum wage are often impoverished and dysfunctional.

- Strong Argument
- Weak Argument
